

## BIODIVERSITY PROTECTION INSTRUCTION

### 1. PURPOSE

The purpose of this instruction is to determine the activities affecting the ecosystems within the activity area, to measure their effects, to plan the necessary processes to reduce the negative effects of these activities and to determine the authorities and practices related to these processes in order to protect the biodiversity within the area of influence of WARWICK HOTEL ANKARA.

### 2. SCOPE

This instruction covers all activities, products and services of WARWICK OTEL ANKARA that may interact with the environment.

### 3. DEFINITIONS

**Biodiversity:** The whole of genes, species, ecosystems and ecological events in a region.

**Ecosystem:** Ecosystems are continuous ecological systems that are formed by the mutual relations of living things in a certain area and the inanimate environment surrounding them.

**Wildlife:** The concept that includes all plants, animals and other organisms that are not domesticated or cultivated, wild life, wilderness.

**Endemic Species:** The name given to species that spread within a narrow area with certain boundaries.

### 4. RESPONSIBLE PERSONS

The Administrative Director is responsible for the execution of this instruction.

### 5. APPLICATION

It is important to protect and preserve the diversity in the natural world, as species that lose their genetic diversity will become extinct. Since humans are also a part of the natural world, our survival depends on nature. Many vital resources, such as the air we breathe and the water we drink, come from nature. Therefore, pollution of nature directly affects us.

For the protection of biodiversity;

- Measuring and evaluating environmental indicators at regular intervals,

- Environmental and biological changes within the ecosystem, natural emissions and normal to distinguish changes that are not necessary and to inform the authorities,
- To protect wildlife, especially rare and endangered species,
- To prevent the extinction of endemic species,
- To protect biodiversity in the biogeography within its area of influence,
- It is necessary to include the entire ecosystem within the scope of influence.

For this reason, WARWICK HOTEL ANKARA

- 5.1. Sustainability impact assessment is carried out,
- 5.2. The biodiversity of the special environmental protection area in the ANKARA region is protected,
- 5.3. The effects of activities that cause climate change are minimized,
- 5.4. Legal regulations established for the protection of biodiversity are followed and complied with.  
(International Treaties, Forest Law, Environmental Law, National Parks  
Law, Coastal Law)
- 5.5. Employees and customers are informed about biodiversity.
